

# International Workshop on Functional and (Constraint) Logic Programming (WFLP 2001)

Kiel, Germany, September 13-15, 2001

## CALL FOR PAPERS

### Program Committee

Slim Abdennadher	LMU München
María Alpuente	UP Valencia
Sergio Antoy	Portland State U
Christoph Beierle	Fern-U Hagen
Alexander Bockmayr	U Nancy
Harold Boley	DFKI Kaiserslautern
François Bry	LMU München
Jürgen Dix	U Koblenz
Rachid Echahed	IMAG Grenoble
Uwe Egly	TU Wien
Moreno Falaschi	U Udine
Burkhard Freitag	U Passau
Thom Frühwirth	LMU München
Norbert E. Fuchs	U Zürich
Ulrich Geske	GMD-FIRST Berlin
Michael Hanus	CAU Kiel (Chair)
Herbert Kuchen	U Münster
Juan José Moreno Navarro	UP Madrid
Mario Rodríguez-Artalejo	UC Madrid
Dietmar Seipel	U Würzburg

### Local Organization

Wolfgang Goerigk  
Michael Hanus  
Klaus Höppner  
Ulrike Pollakowski-Geuther  
Friedemann Simon  
Frank Steiner

### Invited Speakers

Peter Van Roy UC Louvain  
Thomas Arts Ericsson

### Important Dates

**Submission:** May 22, 2001  
**Notification:** June 20, 2001  
**Final versions:** July 20, 2001  
**Workshop:** September 13 - 15, 2001

**General:** WFLP 2001 is the combination of two workshops of a successful series of annual workshops on declarative programming. The international workshops on functional and logic programming aimed at bringing together researchers interested in functional programming, logic programming, as well as their integration. Previous workshops have been held in Benicassim (Spain), Grenoble (France), Bad Honnef (Germany). The workshops on (constraint) logic programming are the annual meeting of the Society of Logic Programming (GLP e.V.) and bring together researchers interested in logic programming, constraint programming, and related areas like databases and artificial intelligence. Previous workshops have been held in Germany, Austria and Switzerland.

In this year both workshops will be jointly organized in order to promote the cross-fertilizing exchange of ideas and experiences among researchers and students from the different communities interested in the foundations, applications, and combinations of high-level, declarative programming languages and related areas. The technical program of the workshop will include invited talks, presentations of refereed papers and demo presentations.

**Topics of Interest** include (but are not limited to):

- Functional programming
- Logic programming
- Constraint programming
- Deductive databases
- Extensions of declarative languages, objects
- Multi-paradigm declarative programming
- Foundations, semantics, nonmonotonic reasoning, dynamics
- Parallelism, concurrency
- Program analysis, abstract interpretation
- Program transformation, partial evaluation, meta-programming
- Specification, verification, declarative debugging
- Knowledge representation, machine learning
- Implementation of declarative languages
- Advanced programming environments and tools
- Applications

**Submissions:** Authors are invited to submit an extended abstract (no longer than 10 pages including figures and references) or a system description (no longer than 3 pages) in postscript format (11pt) before May 15, 2001. Submissions should include the title, authors' names, affiliations, addresses, and e-mail. The details about the procedure to submit papers electronically are described on the workshop website. The primary focus is on new and original research results but submissions describing innovative products, prototypes under development or interesting experiments (e.g., benchmarks) are also encouraged. The proceedings with the full versions of all accepted contributions (no longer than 15 pages for regular contributions and 3 pages for system descriptions) will be published as a Technical Report of the University of Kiel. A special issue of ENTCS (Electronic Notes in Theoretical Computer Science) containing revised versions of high-quality contributions will be organized after the workshop.

**Best newcomer award:** An award will be given to the best paper exclusively written by one or several young researchers who have not yet obtained their PhD degrees. Papers written in this category should be clearly marked "Student papers" in the submission.
